ANASTASIOS A. MANGANARIS

amangana@purdue.edu ◇ West Lafayette, IN ◇ tass0sm.github.io ◇ GitHub ◇ Google Scholar

EDUCATION

Purdue University, West Lafayette, Indiana — Expected May 2028
Ph.D. Computer Science, advised by Ahmed H. Qureshi — GPA: 3.78 (4.0 scale)

The Ohio State University, Columbus, Ohio — May 2023
B.S. Computer Science & Engineering, specialization: A.I., advised by Sanggu Kim — GPA: 3.904 (4.0 scale)

EXPERIENCE

Purdue University, *Research Assistant* — May 2024 – Present

Scaling imitation learning, reinforcement learning, and multi-agent task and motion planning to longer horizons and larger robot teams by exploiting problem structure, using formal specifications and hierarchical decompositions.

- Developed Automaton Constrained Q-Learning for temporal-logic-constrained RL (NeurIPS 2025)
- Built Graph-of-Constraints MPC for reactive multi-robot TAMP, deployed on UR5e arms (ICRA 2026)
- Scaling diffusion policy guidance to compositional tasks using logical world models (submitted to ICRA 2027)
- Developing reactive multi-robot TAMP for loco-manipulator teams, deployed on the Unitree B1 and G1 (ongoing)

Purdue University, *Teaching Assistant, Head Teaching Assistant* — August 2023 – May 2024

- Instruction, course organization, development, and grading for Data Structures and Algorithms

The Ohio State University, *Research Assistant* — December 2021 – May 2023

- Investigated identifying RNA chemical modifications from Nanopore sequencing data and relationship between Nanopore sequence quality and RNA structures.

SentriLock, LLC, *Software Development Intern* — June 2018 – August 2018

- Designed, implemented, and deployed an application for an analytics dashboard.

Under Review

M. Zoellner, **A. Manganaris**, A.H. Qureshi, R. Paleja. Composing Learned Robot Behaviors with Temporal Logic at Runtime. Under review at IEEE International Conference on Robotics and Automation (ICRA), 2027.

V. Giammarino, **A. Manganaris**, A.H. Qureshi. When Interaction Changes Controllability: Physics-informed Goal-Conditioned Reinforcement Learning for Manipulation. Under review at International Conference on Learning Representations (ICLR), 2027.

Workshop Papers

A. Manganaris, R. Banerjee, G. Prabhakaran, A.H. Qureshi. Riemannian Splat Regression Models for Learning Time Fields on Arbitrary Riemannian Manifolds, IROS 2026 Workshop on Geometric-Aware Representations in Robotics. **Spotlight**

SERVICE

Co-organizer, IROS 2026 Workshop on Hybrid Architectures for Embodied Autonomy: Bridging Learning, Planning, and Control
Reviewer, IEEE Robotics and Automation Letters (RA-L), 2026 – Present
Reviewer, Conference on Robot Learning (CoRL), 2024, 2026

SKILLS

Robotics	On-policy and off-policy reinforcement learning, diffusion policies, world models, manipulator control, task and motion planning. Experience with Universal Robots UR5e, Unitree B1 and G1.
Languages	Python, C/C++, Rust, MATLAB
Software & Tools	ROS, ROS2, Isaac Sim, Isaac Lab, MuJoCo, PyTorch, JAX, Linux, Docker, Git, Slurm, AWS
